Öltöző kabin

Stylish and elegant partitioning.

Öltöző kabin

For the high design demands.

EF-3 WK and EF-3 WK JUMP changing cubicles are ideal for the design of changing rooms. Flush fronts, low-footprint constructions and infinite colour combinations are ideal prerequisites for a visually successful and modern changing area. The elevation on a central pedestal under the changing cubicle means that the front can be largely dispensed with. Design, ease of use and ease of cleaning are thus perfectly combined.

(1)

- Under-ride lockers
- Enable easy operation even from a wheelchair
- Variable locker dimensions in width, depth and height
- Very easy adaptation to structural conditions
- Numbering can optionally be in braille

(2) + (3)

- Prefabricated benches, like the lockers made of waterproof HPL solid grade laminate
- The colour design is entirely according to the customer's wishes
- Different colour combinations are an elementary part of the furnishing concept and at the same time serve as orientation

30cm széles öltöző szekrény
